Princeton Job #: 16-11-017

Jeff Jones, Lydia Saad  
November 9-13, 2016

---

Results are based on telephone interviews conducted November 9-13, 2016 with a random sample of 4,019<sup>2</sup> adults, aged 18+ living in all 50 U.S. states and the District of Columbia. For results based on the sample of national adults, the margin of sampling error is  $\pm 4$  percentage points at the 95% confidence level.

For results based on the sample of 1,530<sup>2</sup> men, the margin of sampling error is  $\pm 5$  percentage points.

For results based on the sample of 1,489<sup>2</sup> women, the margin of sampling error is  $\pm 5$  percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish speaking. Each sample of national adults includes a minimum quota of 60% cell phone respondents and 40% landline respondents, with additional minimum quotas by region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Survey Sampling International. Landline respondents are chosen at random within each household on the basis of which member is the next birthday.

Samples are weighted to correct for unequal selection probability, nonresponse, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone only/landline only/both and cell phone mostly). Demographic weighting targets are based on the March 2011 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the July-December 2015 National Health Interview Survey. Population density targets are based on the 2011 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact [galluphelp@gallup.com](mailto:galluphelp@gallup.com)

36. Next, we'd like to get your overall opinion of some people in the news. As I read each name, please say if you have a favorable or unfavorable opinion of that person --

Q.36 (FAVORABLES) CONTINUED

I. The Republican Party (*continued*)

	Favor- able	Unfavor- able	No opinion		Favor- able	Unfavor- able	No opinion
